Health financing studies per 10 million people, by country studied

3 10 30 100 300 1,000

Each study counts once in each country it names (47,488 study-country pairs across 198 countries and territories). Population: World Bank. Log scale, darker = more studies per person; values below 3 or above 1,000 take the end colours. Grey: no study naming the country, or no population data.
