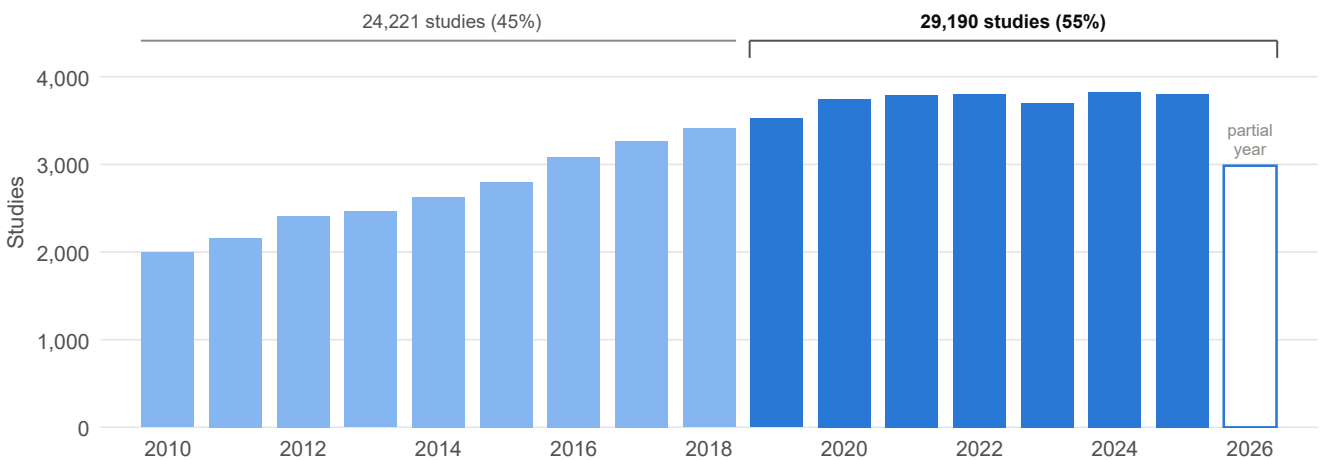
Research on health financing functions is large and growing fast

53,411
health financing studies, 2010-2026

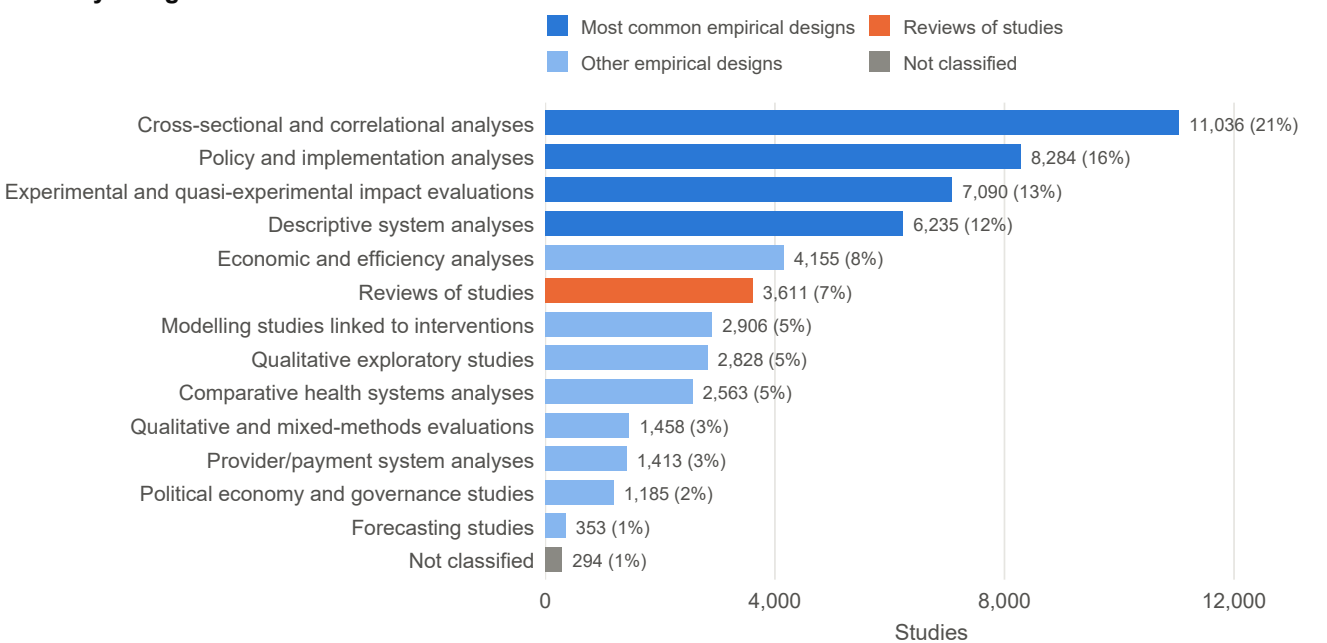
93%
are empirical analyses (49,800 studies)

55%
published in 2019 or later (29,190 studies)

A Studies by year of publication



B Study design



n = 53,411 included studies. Panel A: 2026 is an incomplete year because the search ran mid-year; it is included in the 2019-or-later total. Panel B: one study design per study; reviews of studies synthesise evidence on focused health financing topics, all other designs are empirical analyses.
